

ORGANIZE. AUTOMATE. **GROW**

Your Gmail can do so **much more!**

Push the boundaries with  NetHunt Gmail CRM —
sales and automation tool that lives inside Gmail.

Product Description (25 words):

NetHunt CRM is a sales and automation tool inside **Gmail** that **helps you** manage leads, nurture customer relations, automate CRM workflows, track sales progress, and close more deals.

Product Description (50 words):

NetHunt CRM is a sales and automation tool that lives inside Gmail. Today, **NetHunt CRM blends entirely with Gmail**, placing the **full-featured CRM** right next to your emails, as well as with other Google Workspace apps, LinkedIn, Intercom, and more! NetHunt helps businesses to store and manage customer data, nurture client relationships, automate sales workflows, track deal progress, and move sales down the **funnel faster**.

Our Mission

Since 2016, we've been on a mission to bring more productivity and balance into your working hours.

Our 'CRM Everywhere' idea is about making CRM actually work for you, by adding powerful CRM functionality to the applications you use every day.

Imagine having a full-featured CRM right next to your work emails, chat messages, social media profiles or calendar events.

We're making it possible!

Leadership

Andrei Petrik

CEO and Co-Founder of NetHunt CRM

Having been in the industry for more than 12 years, Andrei knows a thing or two about customer relations and business processes. Prior to developing his own product, Andrei was a Director of Product Management and worked closely with corporations on helping them implement enterprise-level CRM systems.

Our Story

Every company has a story, here is **ours!** We are proud of how much the system has evolved and is evolving. We've **never looked back.**
